Conrad, Inc.
CYBERSECURITY CONSULTING

WHO WE ARE

Conrad, Inc. is a full-service cybersecurity consulting firm based in the D.C. area, that takes pride in building long-term relationships with its clients. Our focus on cybersecurity, threat analysis, and information sharing has enabled us to build and sustain deep knowledge in the industry and personal relationships in the field. We are a small firm, with a global reach, able to provide the personal attention our customers expect with the world-class expertise they demand.

We are at the intersection of cybersecurity policy and operations, engaging directly in the most consequential domestic cybersecurity public policy discussions while producing essential cyber threat analytic reports for some of the world's leading companies. The diversified skill set of the Conrad, Inc. team is tailored to ensuring we can meet the multiple challenges companies face in the cyberspace. With a detailed understanding of the latest cyber threats, a rolodex of cybersecurity professionals around the world, and experience in engaging with senior levels of industry and government, we have the expertise to help clients succeed.

WHAT WE DO

While we can customize services to a client's specific needs, Conrad, Inc. provides the following core services:

Cyber Threat Analytics and Incident Response

Conrad, Inc. provides daily cyber threat analytical reports to security teams across the globe. We work most closely with companies from the IT, Communications, Elections, and Food and Agriculture industries, but also engage across critical infrastructures and with various government partners.
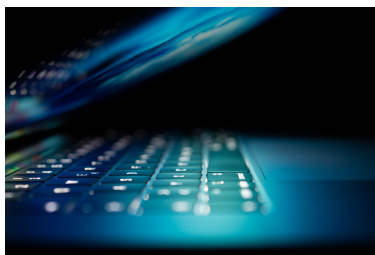

Information Sharing and Analysis

Our company is recognized across industry and government as a leader in building, managing, and promoting information sharing and analysis programs. We build and maintain trusted relationships within industry and government that facilitate and enable the sharing of sensitive threat and vulnerability information. Information sharing forums we manage and helped establish have received awards for their substantial contributions to the information-sharing community.

Strategic Consulting and Organizational Management

We work with clients to define, understand and communicate their market differentiators. We then work with clients to develop and implement plans to attain their business goals and communicate their success.

Public Policy Thought Leadership

We help clients understand the rapidly changing public policy landscape and advise them on how they can best contribute to these discussions. Some clients ask us to engage with senior policymakers on their behalf. We supplement these capabilities with a strategic partnership with Van Scoyoc Associates, a leading DC Government Affairs consultancy.

CLIENTS

Conrad, Inc. leverages subject matter experts to deliver specific solutions tailored to unique customer requirements. Below is a sampling of our current and past customers:

PARTNERS

WHY CONRAD, INC.?

Established in 2016, Conrad, Inc. has the experience, expertise, and global network necessary to help carry out your company's intricate vision. We are a trusted provider of cybersecurity, threat analysis, and information sharing services. Our firm has held many leadership roles throughout the industry.

Some examples of our leadership experience include:

- *Conrad, Inc. represents the IT-ISAC on the Executive Committee of the ICT Supply Chain Risk Management Task Force.*

- *Our Founder, President, and CEO represents the IT-ISAC on the Executive Committee of and served as Treasurer for, the Information Technology Sector Coordinating Council.*

- *In 2018, our client, the IT-ISAC, was inducted into the ISAO Standards Organization's Information Sharing Hall of Fame.*

- *Our Founder, President, and CEO is a member of the Executive Advisory Council for the CompTIA ISAO.*

- *In 2017, we managed the global disclosure of the WPA KRACK Attack vulnerabilities and the 2019 Bluetooth KNOB vulnerability.*

- *We've grown the IT-ISAC from a small community of U.S. based security vendors to a global forum of more than 100 technology companies.*

- *We advised NTCA on the establishment of, and provide operations support for CyberShare, the information sharing forum for small broadband providers.*

- *We've led an industry-government effort that pioneered the "critical functions" based risk assessment approach.*

- *We actively participate in the ISAO Standards Organization's working groups and the development of the NIST Cybersecurity Framework.*

- *We program managed the development of the FIRST PSIRT and CSIRT Frameworks.*
